

LOSE ANONYMITY

Facebook, Google and other Web 2.0 sites are eroding the sense of anonymity that once defined the Internet. But how much is too much? By Michael J. Sautter

¹There are, however, some reasons why it is not clear that the results are representative of the general population. First, the sample was relatively small (N = 100) and the response rate was 20.6% (N = 206). Second, the sample was not randomly selected, but consisted of students who were interested in the research.
